

Microsoft Dynamics GP/Great Plains Consulting

Online integration, troubleshooting, training, and development

If your company has outgrown QuickBooks, is locked into a dead-end accounting package, or wants to expand or upgrade your Microsoft Dynamics GP or Great Plains system, Progent offers the expertise you need at prices you can afford.

Progent's Consulting Services for Microsoft Dynamics/Great Plains

Progent offers expert support for all versions of Microsoft Dynamics GP and can help you design, deploy and manage your GP solution whether it is based in your physical datacenter, hosted in the cloud, or uses a hybrid local/cloud environment. Progent can also help you integrate Dynamics GP with Dynamics CRM for customer service management or sales management solutions.

Microsoft Dynamics GP/Great Plains consulting services available from Progent include:

- Migrate to Dynamics GP from other accounting software or earlier versions of Great Plains
- Integrate Dynamics GP with SQL Server, AD and Azure AD, Office and Office 365, SharePoint, etc.
- Configure physical and virtual servers, workstations, and storage to operate with Dynamics GP
- Design and validate backup/recovery and business continuity solutions
- Troubleshoot connectivity, remote and mobile access, security, and performance issues
- Help with updates, moves, feature packs, service packs, security patches, and third-party add-ons
- Streamline Dynamics GP database administration and system management
- Design, implement, and verify a security and compliance strategy for Dynamics GP
- Provide custom webinar training to improve the way you use Dynamics GP

Custom Reports

Progent's experts can show you how to use powerful reporting tools with Dynamics GP to integrate data from multiple sources across your organization and Progent can help you create and distribute custom reports to help drive smart business decisions. Progent can also help you convert old reports to work with current software. Dynamics GP reporting tools supported by Progent include Management Reporter/FRx, Crystal Reports, SSRS, SQL Server Analysis Services, Report Writer, SmartList Designer, Refreshable Excel Reports, Power BI (Pivot, Query, View, Map), Modifier with VBA, and MS Enterprise Reporting.

Application Development Services

Progent's developers can help you create custom integrations with Dynamics GP that involve projects such as adding windows or .NET controls, importing or exporting data, synchronizing data with external systems, and creating tables for additional data. Progent can work with major development tools including Visual Studio, Dexterity, Continuum, Web Services for Dynamics GP, Integration Manager and Extender.

On Line Consulting Experts

Progent is a pioneer in delivering advanced consulting services online and has successfully delivered remote solutions to businesses in every state in the U.S. Remote support saves travel costs, resolves problems faster than onsite service calls, and streamlines the coordination of large project teams.
