Progent™

Exchange 2010 Migration Support

Certified expertise to help you migrate quickly and affordably to Microsoft Exchange 2010 from earlier versions of Exchange

Exchange 2010 incorporates new technologies that deliver unprecedented levels of availability, security, functionality, speed, capacity, and manageability. All this means a fast payback for upgrading your older Exchange environment. However, it takes a lot of real-world experience to upgrade efficiently from a legacy version of Exchange while maximizing your network's business value.

Progent's Microsoft-certified engineers can help you follow leading practices to migrate smoothly from Exchange 2003 or 2007 to Exchange 2010. Progent can help you select the edition of Exchange 2010 appropriate for your company and evaluate the relative benefits of an on-premise solution, a design based on a remote data center, or a system that uses a cloud environment.

Whatever architecture you choose, Progent can provide comprehensive support for every phase of your Exchange 2010 migration including preparing your current system, planning and project management, cost estimates, specs, recommended sourcing, and setting up transitional coexistence of Exchange 2010 with Exchange 2003 or 2007. You can outsource all migration services to Progent or you can save money by co-sourcing — performing the steps you feel comfortable with on your own.

Support for Key Exchange 2010 Technologies and Related Microsoft Products

Progent can help you understand and implement the new Disk Availability Group (DAG) architecture; set up server roles including CAS, Hub Transport, Unified Messaging, Mailbox, and Edge Transport; move mailboxes and address books; resolve Certificate issues; verify synchronization with mobile devices such as iPhones, iPads, Androids, and BlackBerries; configure Virtual Machines (VMs) with Windows Hyper-V or VMware; upgrade your Active Directory schema and servers; and configure Outlook Web App (OWA) with appropriate authentication.

Progent can also help you integrate Exchange 2010 with complementary Microsoft platforms including Threat Management Server (TMG) for enterprise-class security, Data Protection Manager (DPM) for non-disruptive multi-site backup and fast restore, Lync Server for enhanced Unified Messaging (UM), and System Center Operations Manager (SCOM) for system health monitoring and capacity planning.

On Line Consulting Experts

Progent specializes in delivering advanced consulting solutions online and Progent's Microsoft-certified experts have provided cost-effective remote solutions to companies in every state in the U.S. Progent's clients include large enterprises, ISPs, local and state governments, small and mid-size businesses, and home offices. Remote support saves travel costs, resolves problems faster than onsite service, and streamlines the coordination of large project teams. Progent also offers on-premise support in major metropolitan areas throughout the U.S.
